

GREENER FRAM

action for a positive future

Future Visions: a world beyond oil

Speakers • Refreshments • Information • Discussion

Saturday 27 March 1pm - 6pm

At Thomas Mills High School, Saxtead Road, Framlingham

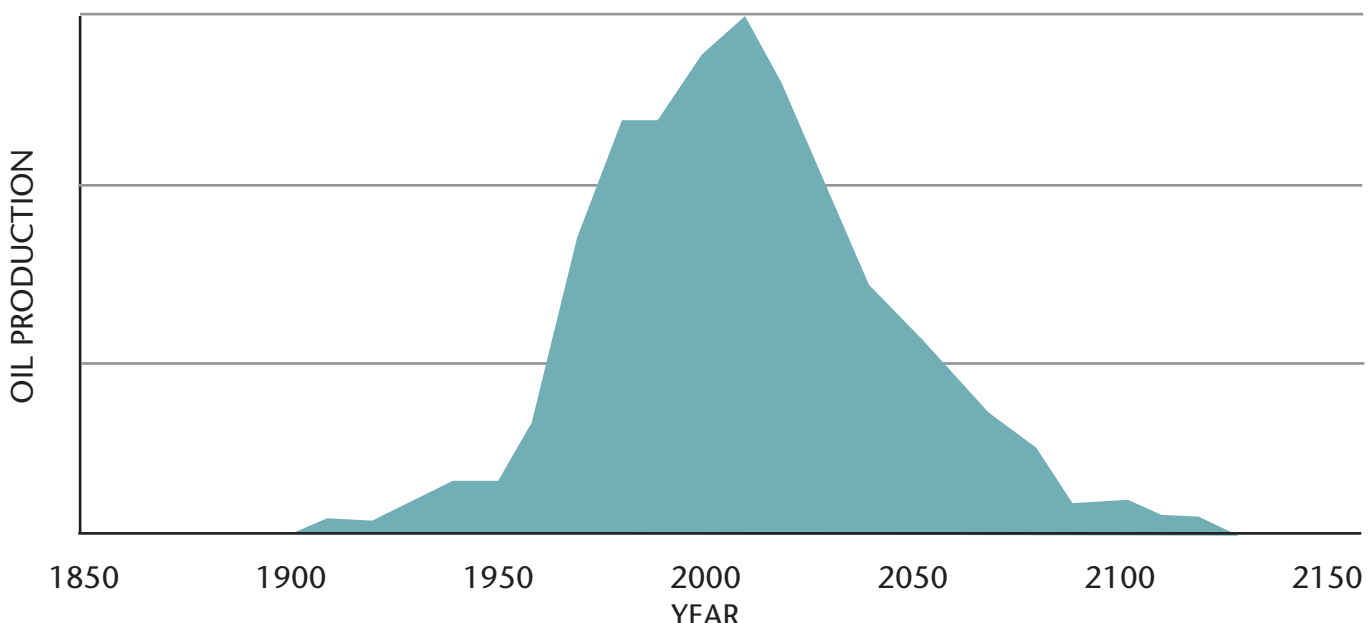

Tickets £4 or £3 conc - available from our web site. Limited number to be sold on the door

Speakers include:

- David Strahan, award winning journalist and Trustee of the Oil Depletion Analysis Centre
- Tim Waygood, farmer, businessman and founder of Agrarian Renaissance
- William Kendall, farmer, miller and champion of local food
- Simon Weeks, of Cookpole Energy Action who are setting up a community wind turbine

How can our communities adapt to changes that will come about through energy depletion and climate change?

How can we secure our future food supplies when at present every calorie of food takes 10 calories of oil to produce?

Much more information at www.greenerfram.org.uk

Projects supported by Suffolk Coastal District Council LSP and Greenprint Steering Group

Time	Speaker
1.15pm to 1.45pm	Simon Weeks , Cookpole Energy Action; a community wind-power project near Halesworth
2.00pm to 3.00pm	David Strahan is an award-winning investigative journalist and documentary film-maker who specializes business and energy. He is a trustee of the Oil Depletion Analysis Centre, fellow of the RSA, and an honorary researcher at the Aon Benfield UCL Hazard Research Centre.
3.15pm to 4.15pm	Tim Waygood was born and raised on Church Farm. All his family farmed when he grew up, now he's the only one. It has been a lifetime of interests and passions that have led him to start up the family farm again and to found the Agrarian Renaissance.
4.30pm to 5.00pm	William Kendall , Maple Farm, Kelsale; <i>"One hundred years ago Maple Farm, along with its neighbours, would have been producing all of the fresh food that the local town and villages needed. We hope that this can be the case again."</i>
5.00pm to 6.00pm	An opportunity for informal discussion to unleash the collective genius of our community, and start the process of designing ways of living that are more enriching, satisfying and connected than at present.

Woodfuel East aims to use locally sourced wood from existing undermanaged woodland to provide heat in small to medium sized boilers. Using this resource sensitively by thinning or coppicing will not only provide woodland owners with diversified income streams but also importantly reduce our carbon footprint and improve the woodland for future generations.

Creating the Greenest County is an aspiration that involves the whole county in responding to climate change and enhancing the natural and historic environment. Suffolk already has many fantastic projects in action, we want to join them up, improve recognition of them and make even more possible.

Food and Farming is a new initiative from the Creating the Greenest County team with a particular bias on local food production

Transition East is a network of Transition initiatives from across East Anglia; from Downham Market to Westcliff-on-Sea, Cambridge to Norwich.

Refreshments will be available with as many local ingredients used as possible

Please see www.greenerfram.org.uk for more details and background information
